EDUCATION

Vellore Institute of Technology

B.Tech in Computer Science, Specialization in Data Science
CGPA: 8.87

Vellore, Tamil Nadu

July 2024 – June 2028

Delhi Public School, Ruby Park

Higher Secondary Education (Class XII)

Kolkata, West Bengal

April 2009 – March 2024

PROJECTS

Astitva | [GitHub](#) | *React Native (Expo), Express.js, Blockchain, JavaScript*

Feb 2026

- Built a Self-Sovereign Identity (SSI) mobile application during a hackathon using React Native (Expo) and Node.js to enable decentralized digital identity management.
- Configured QR code scanning and generation workflows, allowing users to securely share and verify digital credentials within the mobile application in under 5s.
- Designed the mobile UI and navigation architecture in React Native, integrating camera access and secure storage for handling user identity credentials.

SAE-VIT Website | [GitHub](#) | *React, Vite, Sanity CMS, JavaScript, Vercel*

Feb 2026 – Jun 2026

- Engineered the website for SAE-VIT, the automotive engineering chapter of VIT Vellore.
- Integrated a content management system to enable dynamic content management for announcements, blogs, and event updates.
- Designed a scalable and maintainable website architecture to support future features and easy content updates.

CodeBench | [GitHub](#) | *React, Vite, Python, Flask API, Express.js, Supabase*

March 2026

- Facilitated real-time Python code execution and testing within an online coding environment, achieving execution in under 2s.
- Integrated OAuth-based authentication APIs using Google and GitHub for secure user login.
- Enabled dynamic input handling and output rendering for Python programs.

VitalSense | *Arduino, Embedded Systems, Sensors*

Jan 2026 – April 2026

- Developed a real-time patient health monitoring system using Arduino Uno.
- Integrated biomedical sensors like MAX30102 (SpO₂ and Heart Rate), AD8232 (ECG), MPU6050 (Motion Tracking) and LM35 (temperature) sensors with Arduino to capture and visualize physiological signals in real time for basic health diagnostics.
- Built dual operational modes with a hardware switch: ECG signal visualization on the serial monitor and real-time display of heart rate, SpO₂, and body temperature on an LCD interface.

EXPERIENCE

Technical Head at Society of Automotive Engineers (SAE-VIT)

Jan 2026 – Present

Vellore Institute of Technology

Vellore, Tamil Nadu

- Implementing the chapter website serving 100+ members and event participants, enabling centralized content and event updates.
- Co-organized and executed the SAE-VIT Drone Racing League involving 50+ participants from colleges across India.
- Created a PyGame-based vehicle simulation supporting 2D track-based movement testing.

TECHNICAL SKILLS

Languages: Java, Python, C/C++, JavaScript

Web Technologies: HTML, CSS, REST APIs, JSON

Databases: MySQL, Supabase

Frameworks: React, Node.js, Flask, FastAPI

Developer Tools: Git, VS Code, PyCharm, Arduino

Spoken Languages: English, Hindi, Bengali
